Indicadores

- Número de trabajos citables
- Número de trabajos indexados en la Web of Science
- Número y porcentaje de trabajos indexados en el Primer Cuartil (Q1)
- Impacto Normalizado / Citación Normalizada - Crown
- Índice H
- Número de Documentos en el Top 1%
- Número de Documentos en el Top 10%
- Highly Cited Papers
- Otros indicadores
 - Número de Citas recibidas.
 - Promedio de Citas.
 - Trabajos citables firmados con instituciones extranjeras.
 - Trabajos citables firmados con la industria (grandes corporaciones).

Sistemas Clasificatorios

- Essential Science Indicators (ESI) de Clarivate Analytics.
- Para el análisis de las especialidades se han empleado o bien la categoría Web of Science, o bien las categorías propias del Journal Citation Reports. También se ha hecho de la clasificación usando la clasificación de la OECD.

■ Resumen de Indicadores generales

- Artículos publicados por la UGR en 2021 en revistas indexadas en las bases de datos Web of Science (sin incluir ESCI): 4383 artículos científicos (ascenso de un 2,33% sobre el año 2020).
- Artículos científicos publicados por la UGR publica en Acceso Abierto en revistas de la Ruta Dorada (Gold Open Access): 1484.
 - La UGR publica el 24% de sus artículos en revistas en acceso abierto, una cifra que supera la media nacional.
- A nivel nacional y, considerando los años 2017-2021, la UGR se mantiene como la quinta universidad española con mayor producción científica internacional, y la primera universidad de Andalucía gracias a la publicación de un total de 16806 artículos.
- La investigación universitaria granadina se mantiene por quinto año consecutivo entre las 300 mejores universidades del mundo, según la clasificación del Ranking Académico de las Universidades del Mundo (ARWU) de 2021, más conocido como el Ranking de Shanghái.
- En el Ranking de Shanghái la UGR comparte posición con la Autónoma de Barcelona, y la Complutense de Madrid, que también se encuentran entre los puestos 201-300 a nivel mundial, y puestos 2-4 a nivel nacional.
- En 2021 contamos con ocho investigadores altamente citados en las áreas de Computer Science, Cross-Field, Engineering, Mathematics, según los listados de Clarivate Analytics. La UGR es la segunda universidad española con mayor número de investigadores altamente citados por detrás de la Universidad de Barcelona que tiene diez. Hemos de indicar que 25 universidades españolas consiguen situar al menos un investigador en estos listados de excelencia.

Comparativa por especialidades

Para elaborar las Tablas 27 y 28 se ha consultado la posición de las universidades españolas en las diferentes categorías Web of Science durante el quinquenio 2017-2021. Una vez obtenido el listado de universidades españolas en cada una de las categorías, se han identificado aquellas en las cuales la Universidad de Granada se sitúa entre las cinco primeras, considerando para ello el número de trabajos citables como criterio ordenador. De este modo en la Tabla 27 se muestra en qué categorías y en qué puesto la UGR logra situarse en el Top 5 de las universidades españolas. En la siguiente Tabla, la 28, detallamos para cada categoría las cinco primeras universidades, incluyendo cuatro indicadores bibliométricos.

Tabla 27. Categorías Web of Science en las cuáles la Universidad de Granada consigue situarse entre las cinco primeras universidades españolas según el número de trabajos citables durante 2017-2021.

NOTA: En esta sección presentamos los Rankings de los investigadores más importantes identificados por su filiación en España y ordenados por su índice H. Se incluye información por áreas según su índice H. La información de las siguientes tablas se ha obtenido a partir de la base de datos pública elaborada por el Grupo para la Difusión del Índice h (DIH). En la base de datos se integran un buen número de investigadores con la misión de hacer público el nivel de los principales científicos españoles para impulsar la excelencia del país en este ámbito. La base de datos contiene información sobre 3967 investigadores que trabajan en España, de los cuales 2471 aparecen en los rankings de 178 áreas de investigación.

Tabla 51. Nombre e indicadores de los investigadores de la Universidad de Granada que consiguen figurar en los rankings del índice h elaborados por el Grupo para la Difusión del Índice h (DIH) según categoría científica de la Web of Science.
